## NOTICE TO RESIDENTS

The Town will be conducting a test run on the new CodeRED Emergency Notification System on Thursday, January 22, 2015 @ 10:00 am. CodeRED will be replacing the Reverse 911 System. All residents and businesses within the incorporated Town limits that were registered as part of the Reverse 911system already shall receive a call. Listen to the message (if one is left). However, do not be alarmed or reply to, as it is for testing purposes only.

Once all testing has been completed the Town will update the website with additional information, including how to register online and a date for the CodeRED System to go live.

## What is CodeRED and why is it important to me?

CodeRED is an emergency notification service that allows emergency officials to notify residents and businesses by telephone, cell phone, text message, email and social media regarding time-sensitive general and emergency notifications. Only authorized officials have access to the CodeRED system.

## When will CodeRED be used?

Any message regarding the safety, property or welfare of the community will be disseminated using the CodeRED system. These may include AMBER alerts, notifications of hazardous traffic or road conditions, boil water advisories or evacuation notices.
